

PROFESSIONAL SUMMARY

Machine Learning and Artificial Intelligence enthusiast with a background in Mechatronics Engineering and a strong focus on the intersection of AI, machine learning, and robotics with particular interest in cognitive robotics and intelligent systems. Experienced in developing and deploying machine learning and deep learning models for computer vision and predictive analytics, including YOLOv5-based object detection systems and neural network models deployed with Streamlit. Demonstrated research capability with multiple AI-related manuscripts and collaborative projects involving data analysis, model training, and visualization. Skilled in Python and PyTorch, with growing experience in NLP and Transformer-based models. Passionate about applying AI to real-world problems; particularly where intelligence meets physical systems and eager to contribute to innovative machine learning solutions while continuing to develop as an AI engineer.

EDUCATION

Miva Open University, 1059 O.P. Fingesi Road, Mabushi, Abuja 900108, Federal Capital Territory

Plot 1059

POSTGRADUATE (MASTERS *Information Technology(Specialization in Artificial Intelligence)* (DISTINCTION 4.5/5)

January 2026 - January 2027(in view)

Federal University Of Agriculture Abeokuta, Ogun State, Nigeria

B.ENG Mechatronics Engineering (Second Class Upper Honors 3.77/5.0 (3.1/4.0 unofficial))

April 2019 – September 2024

PUBLICATIONS AND MANUSCRIPTS

- Durodola Folasade, Owoeye Samuel, Kamil-Bello Furqan, Daodu Sakira, Makinde Kayode, **Folaranmi Olaniyi**. *Detection and Classification of Growth Stages in Rice Using Artificial Neural Networks*. *Tehnicki Glasnik Journal(Acceptance Letter)*. (Scopus Indexed).
- Durodola Folasade, Eludiora Safiriyu, Owoeye Samuel, **Folaranmi Olaniyi**, Makinde Kayode, Kamil-Bello Furqan, Daodu Sakira. **Implementation of Birds Detection System using YOLOv5 Model**. *Technicki Glasnik Journal(Acceptance Letter)*. (Scopus Indexed)
- Authored Thesis on **Cassava Disease Detection and AI-based Water Management Systems**(Not Published)
- Co-Wrote a Paper on **Predicting Used Car Prices in Nigeria With Machine Learning** (Under Review)

WORK EXPERIENCE

London, Virtual Assistant/Data Science Assistant(Remote)

March 2025 – September 2025

- Assisted a Data Scientist with professional tasks, including job application management, scheduling, and communication.
- Supported database setup and management using **Azure** and **SQL**, gaining exposure to cloud platforms and data organization.
- Conducted research and maintained accurate records to streamline workflows and improve efficiency.
- Collaborated remotely, strengthening adaptability, task prioritization, and cross-functional communication.
- Used Python and SQL for cloud data operations, cutting manual data handling

Nitron FX, Front-End Developer (Remote)

October 2025 – November 2025

- Collaborated with the development team to build and enhance a responsive web application, improving user experience and performance.
- Developed front-end components using HTML, CSS and JavaScript, ensuring clean, maintainable, and scalable code.
- Conducted research and maintained accurate records to streamline workflows and improve efficiency.
- Collaborated remotely, strengthening adaptability, task prioritization, and cross-functional communication.
- Began learning and exploring Salesforce to understand its core features and integration potential.

PROJECTS

Worked on Building a Netflix-like Website

- Built a responsive, Netflix-style user interface using HTML, CSS, and JavaScript.
- Implemented dynamic content rendering and user interactions such as movie browsing, hover effects, and category sections.
- Focused on clean UI structure, performance, and usability.

Participated in Building a Model for Forecasting Antimalarial Drug Demand in Africa

- Contributed to the visualisation and interpretation of model outputs using Matplotlib.
- Designed clear and insightful plots to communicate demand trends and prediction.
- Assisted in analysing the results to validate model performance and ensure actionable insights.

Cassava Disease Detection System using YOLOv5 (deployed on Streamlit)

- Collected and prepared training images from **Kaggle datasets** to build the model.
- Trained and fine-tuned a YOLOv5 object detection model for accurate cassava disease classification.
- Developed and deployed an interactive Streamlit web application, allowing real-time cassava leaf disease detection from uploaded images.

Customer Churn and Salary Prediction with ANN(Deployed on Streamlit)

- Performed data preprocessing and feature engineering on the *Churn_Modelling.csv* dataset using Pandas and Scikit-learn.
- Designed, trained, and fine-tuned separate ANN models for customer churn classification and salary regression using TensorFlow and Keras.
- Deployed interactive Streamlit applications enabling real-time churn prediction and salary estimation, integrating both models for user-friendly insights.

HONORS, AWARDS & RECOGNITION

1. 2nd Best Graduating Student – **CWW Tech Africa (Python)**.
2. Best Graduating Student – **GOMYCODE (Intro to AI)**.

CERTIFICATIONS

1. INTRODUCTION TO ARTIFICIAL INTELLIGENCE - GOMYCODE.
2. CWW TECH AFRICA - INTRODUCTION TO PYTHON.
3. COMPLETE DATA SCIENCE, MACHINE LEARNING,DL,NLP BOOTCAMP.

LEADERSHIP & SERVICE

1. **Block Representative & Koinonia Leader**, Deeper Life Campus Fellowship (FUNAAB) — *2023–2024*
2. **Head Usher & Camp Coordinator**, Deeper Life Corpers Fellowship (NYSC, Plateau State) —*2025–Present*

TECHNICAL SKILLS

Programming: Python, SQL, C++

AI/ML: LLMs (Transformers), NLP, Computer Vision, Pytorch

Research: Publication Experience: Technical Writing

Data Science Libraries: Numpy, Pandas, Matplotlib

Natural Language Processing: NLTK, Llama, Huggingface

Model Deployment: Azure, Streamlit

Backend & APIs: Streamlit, Fast API

SELECTED TALKS AND PRESENTATION

Participated in Inter-Platoon Debate 2025 - **Artificial Intelligence(AI) and the Unfolding Human Civilization : A Call to Leadership.**
